AOTM Tools · Quick guide

Your phone app to match, quote and keep track of every business. 5-minute read.

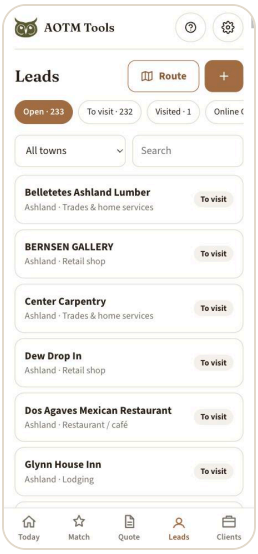

Open it: `tools.alloverthemoon.com` on your phone (Safari or Chrome).
Sign in: your email `contactoconluna@gmail.com` + the password Elías sends you by text.
Make it an app: iPhone: Share button → *Add to Home Screen*. Android: ⋮ menu → *Add to Home screen*. The owl icon appears with your other apps.

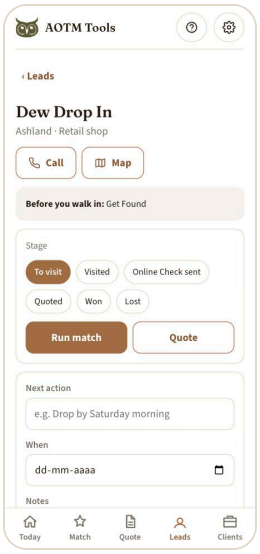

The five tabs

Today

Your morning look: monthly income, setups this month, quotes, and who you promised to call or visit in the next 3 days. Tap **Start a match** or **Visit route**.

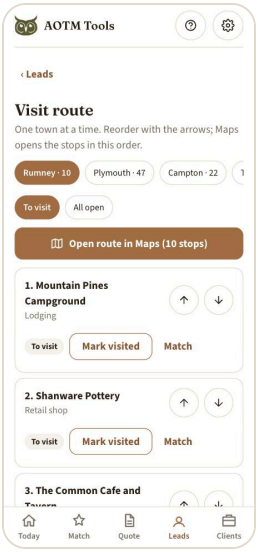

Leads

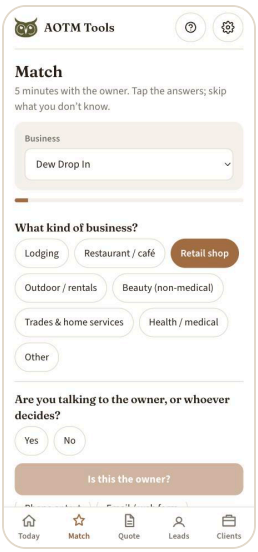

Every business in your 8 towns (233 today), by town. **A** = visit first.

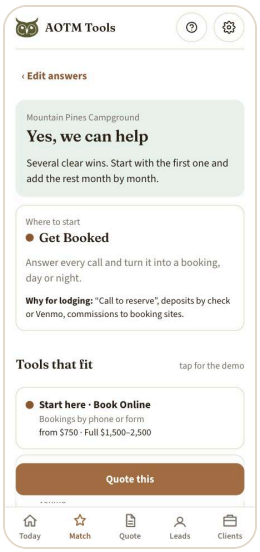

Open one to see **Before you walk in** (where to start and what to say), call or map it, move its stage (To visit → Visited → Quoted → Won/Lost), and write the **next action** with a date. It then shows up on Today.

Visit route

One town at a time. Put the stops in order with the arrows, then **Open route in Maps**: Google Maps drives you through them. Tap **Mark visited** as you go.

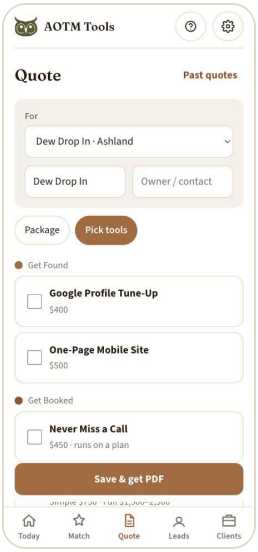

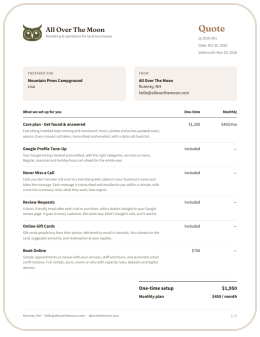

Match

About 5 minutes with the owner. Tap the answers you know; skip the rest. Then **See the match**:

- **Yes, we can help** / **Start small** / **Not yet**
- **Where to start** (the first door)
- Up to 4 tools with the reason. Tap one for the demo and **Say it like this**.
- The suggested plan.

Health and medical practices: the app says **Not a fit** and gives you the polite line to say.

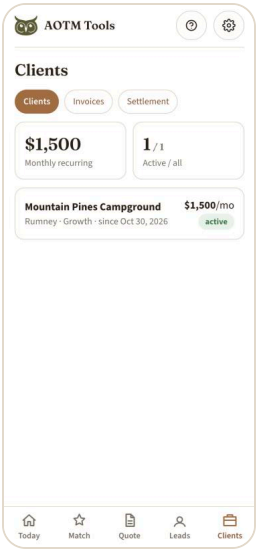

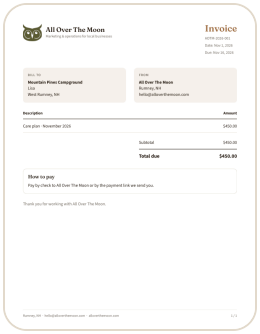

Quote

From the match tap **Quote this**, or open Quote any time. Pick a **Plan** (Care, Growth, Partner) or **Pick tools**. You can change any price for this quote.

Save & get PDF: on your phone it opens the share sheet. Text it, email it or AirDrop it to the owner. The PDF only shows All Over The Moon.

Care at $450/month is the minimum; the app warns you if a monthly plan goes below it.

Clients & invoices

When they say yes: open the lead → **They said yes: make client**. The client keeps the tools, plan and monthly price from the quote.

Invoices: **+ New** → Setup or Monthly → **Save & get PDF**. At the start of each month tap **Create drafts** to make every client's monthly invoice in one go. Mark **paid** when the money arrives. Tax stays at 0% until your CPA says otherwise (Settings).

Good to know

- **No signal?** Keep working. Notes, stages and quotes save on your phone and sync when you're back in coverage. Invoices need signal.
- **Undo:** moved a stage by mistake? Tap **Undo** on the black bar at the bottom.
- **Settings** (gear icon): your business details for the PDFs, payment instructions, tax and prices.
- **Something odd?** Tap **?** (Need help) at the top. It goes straight to Elías, who replies within a day.
